# BKB engineered flooring

## Grading

**CLASSIC** woods are elegant and timeless, possessing a rich beauty that endures for the ages. These versatile woods can be used for both traditional and modern settings. They are exemplified by minimal colour variation and few knots.

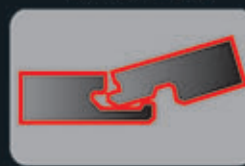

**COUNTRY** woods create an effect reminiscent of cosy cottages and hunting lodges, roaring fireplaces and all-round comfort. The wonderfully rustic charm is enhanced by broad variations in grain, colour and distinctive knots.

All products available on demand.

Wood being a natural product, comes in their own originality and color tones. Characteristics and colors of each species may vary according to many factors. Although we try to capture wood finish colors as accurately as current photographic technology will allow, we should allow for variation in final colours of products.
